Project Manager	Noel Torres		
Technology Owner	Vishal Anand		

3.Executive Summary

This document defines the business and technical requirements for a secure, private web platform designed to enable the client and/or representatives to browse, explore, and enquire about the art collection.

The website is intended as an intuitive interface presenting artwork records sourced from the existing Axiell database. Key features include high-resolution artwork images, metadata browsing, internal enquiry capabilities, and secure sharing tools (e.g., email, WhatsApp), accessible exclusively to authenticated users.

3.1 Introduction

The project scope covers the development and implementation of a secure, client-accessible web portal with the following key features:

- Private, login-protected website accessible only to the client and client rep.
- Integration with the Axiell database via API.
- High-resolution artwork display with zoom functionality.
- Metadata browsing, including search and filtering capabilities.
- Internal enquiry/request functionality on artwork detail pages.
- Secure, optional sharing features (WhatsApp, Email, Copy Link).
- Responsive design optimized for desktops, tablets, and mobile devices.
- Hosting with full encryption and prevention of public indexing or public-facing social media integration.
- Intuitive UI with a look & feel like to the following, demonstrating the desired design, functionality, and content:
 - <https://www.whitecube.com/>
 - <https://www.artsy.net/>
 - <https://irisprojects.online/>
- The objective of this initiative is to deliver a secure, high-performance client portal with <2s response time, 99.9% uptime, and seamless Axiell integration, enabling confidential access to artwork with zero data leakage and high usability.

The detailed project scope is outlined below in the **Functional Requirements** section.

3.2 Actors / Personas

- Client
- Client Representative
- Administrator

Below is the detailed chart of access control based on the user type.

No.	Role	Description	Permission
1	Client	Primary user	Browse artworks, submit enquiries/requests, securely share
2	Client Rep	User	Browse artworks, submit enquiries/requests on behalf of client
3	Administrator	IT & Art Team	Manage users, roles, permissions, and content visibility

4.Functional Requirements

4.1 FN-01: Collection Client Portal

Function ID	Function Description
PHASE 1 - Implementation	
FN01-F001	Secure Login
FN01-F002	Password Protection
FN01-F003	Axiell Integration
FN01-F004	Artwork Viewer
FN01-F005	Metadata Display
FN01-F006	Search & Filter
FN01-F007	Enquiry Button
FN01-F008	Secure Sharing
FN01-F009	Role-Based Access Control (RBAC)
FN01-F010	Access User Management
FN01-F011	Responsive Design
FN01-F012	No Indexing
FN01-F013	Encrypted Hosting
FN01-F014	Activity Logs
FN01-F015	Grid/Card Layout
FN01-F016	Infinite Scroll / Load More
FN01-F017	Favorites / Shortlist
PHASE 2 – Future Enhancements	
FN01-F018	Related Works
FN01-F019	Collections / Themes
FN01-F020	Private Shareable Viewing Links
FN01-F021	Loan / Exhibition Tracker
PHASE 3 – Advanced Services	
FN01-F022	Curated Market Info Links
FN01-F023	Valuation Tools

4.1.1 Secure Login

Requirement ID	FN01-F001				
Process	Secure Login				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to log in using my username and password with optional two-factor authentication, so that my account and data remain secure. Acceptance Criteria: • Users can log in using valid credentials (username and password). • Invalid credentials display an appropriate error message. • Two-factor authentication (2FA) is optional but functional when enabled. • Session automatically expires after inactivity (as per security policy).					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.2 Password Protection

Requirement ID	FN01-F002				
Process	Password Protection				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to ensure that no content is accessible without logging in, so that only authorized users can view artwork and related information. Acceptance Criteria: • No page or artwork content is accessible without authentication. • Direct URLs to protected content redirect to the login page. • Guests or unauthenticated users cannot access internal pages.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.3 Axiell Integration

Requirement ID	FN01-F003				
Process	Axiell Integration				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development

Requirement Definition

As an admin or system, I want to link and synchronize artwork records from Axiell via API, so that the platform reflects the catalog data based on the user access permissions defined.

Acceptance Criteria:

- Artwork records sync successfully from Axiell via API.
- Data updates in Axiell must sync in real time / instantly with the web portal, especially for location changes and other metadata.
- Only authorized users (as per RBAC) can access integrated content.
- API errors are logged, and failed sync attempts are retried automatically.
- Vendor is fully responsible for integration, including middleware, API consumption, data transformation, and error handling.

Solution (To Be Filled by Vendor)

4.1.4 Artwork Viewer

Requirement ID	FN01-F004			
Process	Artwork Viewer			
Solution Type		Direct Mapping		Workaround X Custom/Development
<u>Requirement Definition</u>				
As a user (All Users), I want to view high-resolution images of artworks with zoom and pan features, so that I can explore artwork details clearly and interactively.				
Acceptance Criteria:				
• Artwork images load in high resolution. • Users can zoom and pan images smoothly without pixel distortion. • Images maintain aspect ratio and responsive scaling on all devices.				
<u>Solution (To Be Filled by Vendor)</u>				

4.1.5 Metadata Display

Requirement ID	FN01-F005			
Process	Metadata Display			
Solution Type		Direct Mapping		Workaround X Custom/Development

Requirement Definition

As a user (All Users), I want to see artwork metadata such as artist, title, year, medium, dimensions, provenance, location, etc., so that I can access required information about each artwork.

Acceptance Criteria:

- Each artwork page displays metadata fields (artist, title, year, medium, dimensions, provenance, location, etc.).
- Metadata is fetched from Axiell and displayed correctly.

Solution (To Be Filled by Vendor)

4.1.6 Search & Filter

Requirement ID	FN01-F006				
Process	Search & Filter				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u>					
As a user (All Users), I want to search and filter artworks by artist, year, medium, or category, etc., so that I can easily find specific pieces of interest.					
Acceptance Criteria:					
• Users can search artworks by artist, title, or keyword. • Filters (year, medium, category, etc.) refine results accurately. • Search results display relevant artworks only. • Search and filter combinations work together without errors.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.7 Enquiry Button

Requirement ID	FN01-F007				
Process	Enquiry Button				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u>					
As a client or client representative, I want to submit an enquiry or comment directly from an artwork page, so that I can easily communicate interest or request more details.					
Process Flow					
1. User submits the enquiry form from the artwork page 2. System:					

- Send an email notification to the Admin / Arts Team
- Stores the enquiry in the database
- 3. Admin / Arts Team:
 - Can view enquiries via backend or client portal
 - Can manage, assign, or respond internally

Acceptance Criteria:

- Enquiry button appears on each artwork page for authorized users.
- Clicking opens an enquiry form with pre-filled artwork reference.
- Upon submission:
 - An email notification is sent to the Admin / Arts Team / Client Rep
 - The enquiry is stored in the database for internal tracking
 - A confirmation message is displayed to the user after submission
 - The Admin / Arts Team can:
 - View all enquiries in the system
 - Manage and assign enquiries
 - Track enquiry history (audit trail)
- No tracking for users who submitted the inquiry.
- Confirmation message shown after submission.

Solution (To Be Filled by Vendor)

4.1.8 Secure Sharing

Requirement ID	FN01-F008			
Process	Secure Sharing			
Solution Type	Direct Mapping	Workaround	X	Custom/Development
<u>Requirement Definition</u> As a client or client representative, I want to share individual or multiple artworks/pieces – potentially 100+ in a single request through private links via WhatsApp or email, with access restricted to authenticated users, so that I can securely showcase artworks to other users without exposing them to public access. Process Flow - Admin / Client Rep / Client generates a private shareable link for selected individual artwork(s) - Link is shared via WhatsApp or email - Recipient clicks the link - System: ○ Prompts for authentication ○ Send an OTP to the recipient's registered email - Recipient enters OTP to verify identity - Upon successful verification: ○ Access to the artwork is granted Acceptance Criteria: • Admin/client can generate private shareable links for individual or multiple artworks. • Shared links are accessible only to authenticated users. • Links can be sent via WhatsApp or email directly from the platform. • Access is granted only after successful OTP verification.				

- Expiry dates and access restrictions work as configured (for instance OTP will expire within 10 minutes, while the shared link will remain valid for 24 hours.)

Solution (To Be Filled by Vendor)

4.1.9 Role-Based Access Control (RBAC)

Requirement ID	FN01-F009				
Process	Role-Based Access Control (RBAC)				
Solution Type	☐	☐ Direct Mapping	☐	☒ Workaround	☐ Custom/Development
<u>Requirement Definition</u> As an admin, I want to assign and manage visibility and permissions by user role, so that users only access features and content relevant to their responsibilities. Acceptance Criteria: • Admin can modify and assign user roles. • Users only see items, features, and artworks allowed by their role. • Unauthorized access attempts are denied and logged.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.10 Access User Management

Requirement ID	FN01-F010				
Process	Access User Management				
Solution Type	☐	☐ Direct Mapping	☐	☒ Workaround	☐ Custom/Development
<u>Requirement Definition</u> As an admin, I want to access the user management settings to manage users, permissions, and activities, so that I can maintain control over the system and user access. Acceptance Criteria: • Admin can manage user permissions. • Changes in user roles update instantly across the system.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.11 Responsive Design

Requirement ID	FN01-F011				
Process	Responsive Design				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to use the portal across desktop, tablet, and mobile devices with a responsive design, aligned with company branding and in the English as preferred language, so that I can view and manage artworks conveniently from any device. Acceptance Criteria: - Layout adapts to desktop, tablet, and mobile screens without distortion. - All buttons, forms, and images remain functional and readable on all devices. - The interface adheres to company branding guidelines (logo, colors, and styling). - The portal is available in English language (default). - Browser compatibility (e.g., Chrome, Edge, Safari).					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.12 No Indexing

Requirement ID	FN01-F012				
Process	No Indexing				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u> As a system, I want to prevent indexing by search engines, so that the platform remains private and inaccessible through public search results. Acceptance Criteria: The web portal is not searchable via Google or public search engines.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.13 Encrypted Hosting

Requirement ID	FN01-F013				
Process	Encrypted Hosting				
Solution Type		Direct Mapping		Workaround	X Custom/Development

Requirement Definition

As a user (All Users), I want to have all data hosted on encrypted servers, so that my information and artwork data are protected from unauthorized access.

Acceptance Criteria:

- Hosting uses HTTPS (SSL/TLS) for all pages.

Solution (To Be Filled by Vendor)

4.1.14 Activity Logs

Requirement ID	FN01-F014				
Process	Activity Logs				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u>					
As an admin, I want to track user logins and actions, so that I can monitor system activity and ensure accountability.					
Acceptance Criteria:					
• System logs all user logins, failed attempts, and key actions (add/edit/delete). • Admin can filter logs by date, user, or activity type. • Audit logs are stored securely and non-editable.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.15 Grid / Card Layout

Requirement ID	FN01-F015				
Process	Grid / Card Layout				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u>					
As a user (All Users), I want to browse artworks in a visually rich grid or card layout similar to Artsy Collect (https://www.artsy.net/collect), so that I can enjoy an intuitive and aesthetic browsing experience.					
Acceptance Criteria:					
• Artworks display in grid/card format with thumbnails and essential information. • The layout must be configurable and customizable based on user preferences. • Layout adjusts to screen size and number of artworks. • Clicking a card opens the detailed artwork view.					

Solution (To Be Filled by Vendor)

4.1.16 Infinite Scroll / Load More

Requirement ID	FN01-F016				
Process	Infinite Scroll / Load More				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to scroll or load more artworks seamlessly or via pagination, so that I can explore collections without interruption. Acceptance Criteria: • Additional artworks load automatically when scrolling or via “Load More” button. • Loading is seamless with no page refresh. • Pagination or infinite scroll logic works consistently across devices.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.17 Favorites / Shortlist

Requirement ID	FN01-F017				
Process	Favorites / Shortlist				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to tag or save my favorite artworks to a personal shortlist, so that I can revisit them easily at any point in time. Acceptance Criteria: • Users can tag artworks as favorites or add to a shortlist. • Shortlisted artworks persist in the user's account. • Users can remove items from shortlist at any time. • Shortlist loads quickly from any device.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.18 Relater Works

Requirement ID	FN01-F018				
Process	Related Works				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As a user (All Users), I want to see related artworks automatically displayed based on artist, medium, or period, so that I can easily explore similar works. Acceptance Criteria: • The system automatically displays related artworks based on matching criteria such as artist, medium, or period. • Related works appear dynamically on each artwork detail page without manual tagging. • Clicking a related artwork navigates to its detail page. • Admin can configure or override related-work parameters if needed.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.19 Collections / Themes

Requirement ID	FN01-F019				
Process	Collections / Themes				
Solution Type	☐	Direct Mapping	☐	Workaround	☒ Custom/Development
<u>Requirement Definition</u> As an admin, I want to create curated internal groups of artworks organized by collection or themes, so that I can present artworks in meaningful narratives or categories for internal review or client presentation. Acceptance Criteria: • Admin can create and name collections or themes. • Artworks can be added or removed from collections via the admin interface. • Collections display grouped artworks with title, description, and thumbnail. • Collections are searchable and viewable by authorized users (internal or client). • Changes to collections update immediately across the platform.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.20 Private Shareable Viewing Links

Requirement ID	FN01-F020				
Process	Private Shareable Viewing Links				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u> As an admin or client/rep, I want to generate password-protected private viewing links for selected artworks, so that I can securely share curated selections with specific recipients and control access with restrictions and expiry options (similar to Artlogic Private Views). Acceptance Criteria: • Admin or client/rep can generate shareable viewing links for selected artworks. • Links are password-protected and accessible only to recipients with credentials. • Admin/client can set access restrictions (e.g., view-only, no download). • Expiry dates can be configured, and expired links become inaccessible. • This should follow the same authentication mechanism for Secure Sharing.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.21 Loan / Exhibition Tracker

Requirement ID	FN01-F021				
Process	Loan / Exhibition Tracker				
Solution Type		Direct Mapping		Workaround	X Custom/Development
<u>Requirement Definition</u> As an admin, I want to track artworks on consignments or placed in external exhibitions, so that I can maintain visibility of each artwork's location and status. Acceptance Criteria: • Admin can record artwork currently on loan or displayed externally. • Admin can update or close loan records upon artwork return. • System provides visibility of loan status and generates alerts for upcoming returns.					
<u>Solution (To Be Filled by Vendor)</u>					

4.1.22 Curated Market Info Links

Requirement ID	FN01-F022				
Process	Curated Market Info Links				
Solution Type		Direct Mapping		Workaround	X Custom/Development

Requirement Definition

As a user (All Users), I want to access curated external links and embedded market information such as auction results, news, and analytics related to collection artworks, with the ability for these to be manually added, so that I can stay informed about market trends and contextual insights for each piece.

Acceptance Criteria:

- Each artwork page displays curated external market information such as auction results, articles, or analytics.
- External links open in a new tab and are validated to ensure they are safe and relevant.
- Embedded content (iframes or widgets) loads correctly without affecting page performance.
- Admin can add, edit, or remove curated links for specific artworks or collections.

Solution (To Be Filled by Vendor)

4.1.23 Valuation Tools

Requirement ID	FN01-F023			
Process	Valuation Tools			
Solution Type	☐ Direct Mapping	☐ Workaround	☒ X	☐ Custom/Development
<u>Requirement Definition</u>				
As an admin, I want to integrate external valuation and pricing comparables, so that I can reference accurate market data to support pricing.				
Acceptance Criteria:				
• Admin can integrate or link external valuation and pricing. • The system retrieves and displays current or historical pricing comparables for artworks. • Valuation data can be filtered by artist, period, or medium. • Any manual valuation entries are logged with date, source, and user who entered them. • Pricing information displays only authorized users based on role.				
<u>Solution (To Be Filled by Vendor)</u>				

5.Non-Functional & Technical Requirements

Req#	Description	Requirement
1	Performance & Scalability	- The system should support concurrent users without performance degradation. - Page response time: ≤ 2 seconds under normal load - Image load optimization via CDN for high resolution artwork - Ability to handle large image files (up to 500 MB limits) efficiently - The system must be horizontally scalable to accommodate future growth.
2	Security & Compliance	Authentication: Support for Single Sign-On (SSO), Multi-Factor Authentication (MFA) / integration with AD. Access Control: Role-based permissions and granular access rights. Encryption: Documents encrypted at rest and in transit using industry standards Audit Trails: Maintain detailed logs of user activities (view, edit, download, delete, details of employee and actions made). Compliance: Ensure adherence to UAE PDPL, ISO 27001, or other relevant regulations. - The Vendor shall: - Conduct Vulnerability Assessment and Penetration Testing (VAPT) prior to go-live - Address all critical and high vulnerabilities before production deployment - Provide a certified VAPT report - Security requirements include: - Encryption at rest and in transit - Secure API authentication mechanisms - Protection against OWASP Top 10 vulnerabilities
3	Availability & Reliability	High availability (99.9% uptime SLA). Failover mechanisms to ensure business continuity. Automated backups (daily, weekly, or configurable intervals). Disaster recovery plan with RTO (Recovery Time Objective) & RPO (Recovery Point Objective) defined.
4	Usability & Accessibility	User-friendly UI with responsive design (web, mobile compatibility). Multilingual support for international users.
5	Maintainability & Extensibility	- Modular architecture for easy upgrades & maintenance. - API-driven approach for third-party integrations.

		Configurable workflows and settings without code modifications.
6	Deployment Options	- Ability to deploy on-premise and/or hosted on a sovereign cloud (within UAE) or in Azure Cloud environment and must comply to standard security compliance for data protection. - Vendor must conduct VAPT before go-live and share report.
7	Data Ownership & Protection	All data within the system, including artwork metadata, images, and user data, shall remain the exclusive property of Yosh Hospitality. The Vendor shall: - Not access, use, or share data for any purpose outside the scope of this project - Ensure compliance with UAE PDPL data protection laws - Implement strict access controls and audit mechanisms
8	Environments & Deployment Architecture	The Vendor shall provision and maintain the following environments: - Development Environment – for build and unit testing - UAT Environment – for business validation and testing - Production Environment – for live operations The Vendor must: - Ensure environment segregation with controlled access - Implement CI/CD pipelines for controlled deployments - Maintain version control and rollback mechanisms Deployment must follow: - Approval-based promotion from Dev → UAT → Production - Zero-downtime or minimal downtime deployment strategy
9	Intellectual Property & Ownership	All deliverables developed under this engagement, including but not limited to source code, application logic, APIs, configurations, documentation, designs, and integrations, shall be the sole and exclusive property of Yosh Hospitality LLC. The Vendor shall: - Provide full access to the complete source code repository (including version history) upon delivery and throughout the project lifecycle. - Ensure that all components developed are free from third-party ownership restrictions, unless explicitly approved in writing. - Clearly identify any third-party libraries, frameworks, or licensed components, along with associated licensing terms. - Grant Yosh Hospitality perpetual, irrevocable, royalty-free rights to use, modify, enhance, and transfer the solution. The Vendor shall not: - Reuse or resell any proprietary components developed specifically for Yosh Hospitality without written consent. In the event of contract termination (for any reason), the Vendor must:

		- Immediately hand over all source code, configurations, credentials, and documentation. - Ensure the system remains fully operational during the transition period.
10	Acceptance & UAT	The system shall be considered accepted only when: - All functional requirements are delivered and tested - No Critical or High severity defects remain open - UAT sign-off is formally approved by Yosh Hospitality Yosh Hospitality reserves the right to: - Reject deliverables not meeting defined acceptance criteria - Withhold payments until successful completion
11	Hypercare Support	The Vendor shall provide a minimum 4 weeks Hypercare period post go-live, which includes: Dedicated support team Immediate resolution of critical defects Performance monitoring and optimisation Hypercare support shall be included within the project cost.
12	Change Management & Governance	Any deviation from the agreed scope shall be governed through a formal Change Request (CR) process. The Vendor shall: - Submit a detailed impact assessment for each change request, including: - Cost impact - Timeline impact - Technical implications - Not proceed with any change without formal written approval from Yosh Hospitality. Yosh Hospitality will: - Review and approve/reject CRs through designated governance channels. Minor changes (defined as effort $\leq$ agreed threshold) shall be accommodated within the project cost. A Steering Committee / Project Governance structure will oversee: - Milestone approvals - Risk management - Issue resolution
